1. Applicant is advised that should claims 4-7 be found allowable, claims 11-13 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

2. Claims 10 and 28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As per dependent claim 10, the claim recites a "computing device". However, the parent claim [1] recites a computer-readable medium; resulting hybrid claim.

As per dependent claim 28, the claim recites a "computer-readable medium". However, the parent claim [20] recites a method, i.e., process; resulting hybrid claim.

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-36 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The claims recite a computer-readable medium / computing device / method / system for performing a mathematical function. It is noted that system claims broadly recite a processor & memory which are NOT specific physical structures.

Art Unit: 2193

"[t]o satisfy section 101 requirements, the claim must be for a practical application of the Sec. 101 judicial exception, which can be identified in various ways:

- . The claimed invention "transforms" an article or physical object to a different state or thing.
- . The claimed invention otherwise produces a useful, concrete and tangible result,...".

See "Interim Guidelines for Examination of Patent Applications for Patent Subject Matter Eligibility" OG Date: 22 November 2005.

Since there is no physical transform to establish a practical application, a useful, concrete and tangible result appears to be lacking. Therefore, claims 1-36 are directed to a non-statutory process.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

5. Claims 1-3, 8-10, 20-22, 27-29 and 34-36 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by applicant's BACKGROUND.

The "Classical School Style", e.g., see page 2, lines 12-16 or page 6, line 21 to page 7, line 1, teaches the claimed invention.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cited references are art of interest.

Art Unit: 2193

7. The following is an examiner's statement of reasons for allowance: the recorded references do NOT teach or suggest the detail equation, i.e., Equation [5], as recited in dependent claims 4, 23 and 30. Similar language is used in other independent claim 11.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
